

It's time to talk about:

WHICH WAY FORWARD FOR TODAY'S AUTOWORKERS?

The Ford workers overwhelmingly said, "We've given enough!"

It's time for all UAW auto workers to take stock of their situation, to listen to each other, to know why more concessions won't protect us or save the companies either. We've been driven to the wall!

They don't even want to pay us a 'living wage' or make sure our families have real income protection. We're almost back to the pre-UAW days of the early 1930's—low wages, inadequate benefits, speed-ups, inhumane working conditions, company unionism, and intimidation rather than job security.

It's time to talk with each other about taking control of our future!

There's a meeting being called to do just that.
